Enfreaked Wombs: Outting the Cord between Mother and Woman

Build your own prosthetic womb doll!

You will need: scissors, glue, brads (not included in digital download).

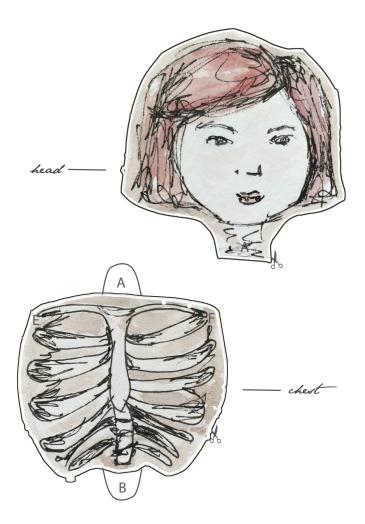

1. Using scissors, cut out pieces in following pages.

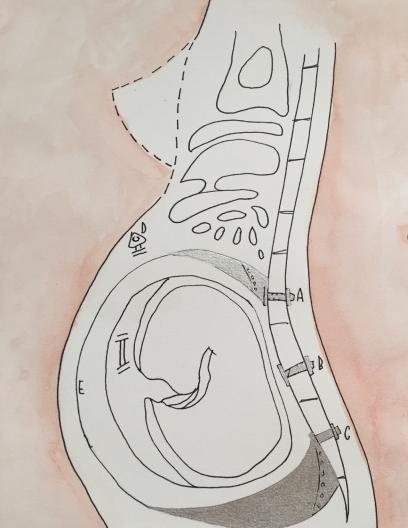

2. Attach body parts as indicated (A to A, etc.) using brass brads.

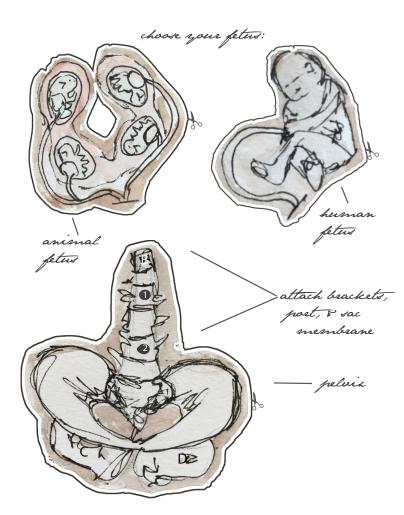

3. Cut out bracket and port.

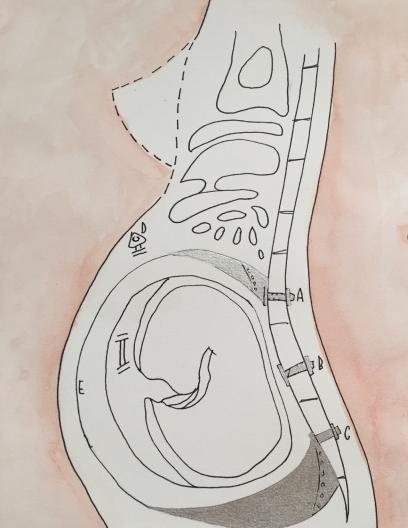

- 1. Attach bracket to spine with brads.
- 5. Sandwich fetus between sac membrane pieces.
- 6. Glue sac membrane to bracket.
- 7. Glue port to sac membrane.
